

BioNgraft™

Moldable Synthetic Bone Substitute

Product Features

- **Ready to Use**

Pre-loaded in a convenient applicator, syringe ready for direct placement in the defect. Easily molded by hand as needed. Requires no mixing.

- **%100 synthetic**

Contains no tissue of human or animal origin therefore carries no risk of disease transmission.

- **Osteoconductive**

Provides a scaffold for new bone. Highly interconnected porosity with excellent mechanical resistance.

- **Bioresorbable**

With its optimized porous structure and chemical composition, our products are suitable for the continuous remodeling cycle of healthy bone. β -TCP resorbs over time and being replaced with bone during the healing process.

BioNgraft™

Moldable Synthetic Bone Substitute

Composition

Biongraft is an injectable and formable paste bone graft based on hydrogel and Beta tricalcium phosphate (β -TCP), including ZrO₂ nanoparticles for antibacterial efficacy.

Indications

- Osteotomies
- Fractures with loss of bone material
- Acetabular reconstruction
- Metaphysial fractures
- Extremity fractures
- Filling cages in spinal surgery

Specifications

REFERENCE CODE	DESCRIPTION	PACKAGING	VOLUME
TBGP01	Putty(Syringe 1cc)	1 unit/Box	1cc
TBGP03	Putty(Syringe 3cc)	1 unit/Box	3cc
TBGP05	Putty(Syringe 5cc)	1 unit/Box	5cc
TBGP10	Putty(Syringe 10cc)	1 unit/Box	10cc
